

# WISCONSIN OVEN

## TOP LOAD OVENS

*Top loading ovens feature a vertical loading configuration that allows long parts like tubes, extrusions, and cylindrical tanks to be loaded using a crane, which significantly reduces floorspace requirements.*

### *Premium Quality & Performance*

- **Reduced floor space requirements** in comparison to a front-loaded batch style ovens
- **Accommodates loading via crane** or overhead hoist
- **Ideal for long, narrow parts** that are difficult to load using a fork truck
- **High volume airflow** provides excellent temperature uniformity and heating rates
- **Exceptional customer service:** Dedicated team provides comprehensive support, from pre-sale consultation to startup, training, and full turnkey installation
- **Energy efficiency:** Innovative, patented designs minimize energy consumption, lowering operating costs. E-Pack™ energy efficiency packages offered. ([www.oven-epack.com](http://www.oven-epack.com))
- **Datasense® IoT system:** Allows us to remotely diagnose any technical issues, reducing downtime and improving operating efficiency. Optional data dashboards are available for user access.
- **Factory tested PRIOR to shipment** to reduce installation and start-up times

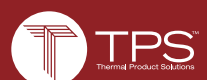

**DataSense**

# WISCONSIN OVEN

## TOP LOAD OVENS

### Standard Features

- All heating types: electric, gas, indirect gas
- Temperature rating up to 1,400° F (760° C)
- High capacity air recirculation system
- Rugged, reinforced adjustable supply ductwork to deliver the heated air evenly
- Tight temperature control using SSR/SCR power control on electrically heated ovens or modulating gas burner for gas fired ovens
- NFPA & NEC compliant
- DataSense® IoT Monitoring System

### Available Options

- Available with our exclusive Energy Efficient E-Pack™ oven upgrade (please see [www.oven-epack.com](http://www.oven-epack.com) for further info)
- Cradle or fixture to support the load
- Manual or powered door lift
- Rotation system to rotate the parts during heating
- Multiple airflow arrangements to meet your production needs
- Guaranteed temperature uniformity and certification to AMS2750, BAC5621 and others
- PLC control system
- Many more options available upon request
